# WatchOut

## How to run the code

No additional Frameworks required

Optional:

If one would like to play around with the light sensor mechanic in the "Delivery" task do the following:

1. Go to Watchout/Controller/DeliverController.swift in the project.

2. Change the following values to what you like:

    a.    minLightIntensity (line 43)

    b.    maxLightIntensity (line 44)
